

Chemistry often feels unpredictable during NEET preparation because it combines conceptual learning, memorisation, numerical solving, and reaction-based understanding in a single subject. Many aspirants find themselves comfortable in one branch of Chemistry while struggling with another, especially when revision pressure increases closer to the exam.

With Re-NEET to take place on 21 June 2026, prioritising the latest syllabus and high-weightage chapters has become even more important for efficient preparation. Understanding topic-wise coverage and chapter trends can help improve revision planning and the accuracy of question-solving. Physics Wallah supports NEET Chemistry preparation through notes, reaction sheets, MCQs, PYQs, mock tests, and chapter-wise practice resources.

NEET Unit-wise Chemistry Syllabus 2026

The NEET Chemistry syllabus includes topics from Physical Chemistry, Organic Chemistry, and Inorganic Chemistry, based mainly on NCERT Class 11 and Class 12 Chemistry.

NEET Chemistry Topics	Description
Some Basic Concepts	Matter and its nature, Dalton's atomic theory, atoms, molecules, elements, compounds, laws of chemical combination, mole concept, molar mass, percentage composition, empirical and molecular formula, stoichiometry
Atomic Structure	Electromagnetic radiation, photoelectric effect, hydrogen spectrum, Bohr model, de Broglie relation, Heisenberg uncertainty principle, quantum numbers, atomic orbitals, electronic configuration, Aufbau principle, Hund's rule
Chemical Bonding & Molecular Structure	Ionic and covalent bonding, lattice enthalpy, electronegativity, dipole moment, VSEPR theory, hybridisation, resonance,

	molecular orbital theory, sigma and pi bonds, bond order, hydrogen bonding
Chemical Thermodynamics	System and surroundings, state functions, first and second laws of thermodynamics, enthalpy, Hess law, spontaneity, Gibbs energy, entropy and equilibrium constant
Solutions	Molarity, molality, mole fraction, vapour pressure, Raoult's law, ideal and non-ideal solutions, colligative properties, osmotic pressure, van't Hoff factor
Equilibrium	Physical and chemical equilibrium, equilibrium constant, Le Chatelier principle, ionic equilibrium, acids and bases, pH scale, buffer solutions, solubility product, hydrolysis of salts
Redox & Electrochemistry	Oxidation and reduction, oxidation number, balancing redox reactions, electrolytic and galvanic cells, electrode potential, Nernst equation, conductance, Kohlrausch law, fuel cells
Chemical Kinetics	Rate of reaction, rate law, order and molecularity, rate constant, zero and first order reactions, half-life, Arrhenius equation, activation energy, collision theory
Classification & Periodicity	Modern periodic law, periodic table, s, p, d and f block elements, atomic and ionic radii, ionization enthalpy, electron gain enthalpy, oxidation states and periodic trends
P-Block Elements	Group 13 to 18 elements, electronic configuration, physical and chemical properties, periodic trends and anomalous behaviour of first element
d- and f-Block Elements	Transition elements, oxidation states, magnetic and catalytic properties, complex formation, lanthanoids, actinoids, KMnO_4 and $\text{K}_2\text{Cr}_2\text{O}_7$ preparation and properties
Coordination Compounds	Werner's theory, ligands, coordination number, denticity, chelation, IUPAC nomenclature, isomerism, valence bond theory, crystal field theory, magnetic properties and applications

Purification & Characterisation	Crystallisation, sublimation, distillation, chromatography, qualitative and quantitative organic analysis, detection of nitrogen, sulphur, phosphorus and halogens
Basic Principles of Organic Chemistry	Hybridisation, functional groups, homologous series, isomerism, IUPAC nomenclature, carbocations, carbanions, free radicals, inductive effect, resonance, hyperconjugation and reaction mechanisms
Hydrocarbons	Alkanes, alkenes, alkynes and aromatic hydrocarbons, conformations, electrophilic addition, Markovnikov rule, ozonolysis, polymerisation, benzene reactions and aromaticity
Compounds with Halogens	Haloalkanes and haloarenes, preparation, properties, substitution reactions, uses and environmental effects of DDT, freons and chloroform
Compounds with Oxygen	Alcohols, phenols, ethers, aldehydes, ketones and carboxylic acids, dehydration, nucleophilic addition, aldol condensation, Cannizzaro reaction, haloform reaction and acidity
Compounds with Nitrogen	Amines, diazonium salts, nomenclature, classification, basic character, preparation, reactions and synthetic applications
Biomolecules	Carbohydrates, glucose, fructose, proteins, amino acids, peptide bond, enzymes, vitamins, DNA, RNA, nucleic acids and hormones
Practical Chemistry Principles	Functional group detection, salt analysis, titrations, preparation of organic and inorganic compounds, enthalpy experiments, colloids and kinetic study experiments

[PW 39 Years NEET Chemistry PYQ Book](#) offers chapterwise and yearwise solved NEET Chemistry questions with detailed solutions, trend analysis, and exam-focused practice for NEET aspirants.

NEET Chemistry Chapter-wise Weightage 2026

Understanding chapter-wise weightage helps in prioritising high-scoring areas and planning revision more effectively. Physical Chemistry, Organic Chemistry, and Inorganic Chemistry all contribute significantly to the NEET examination.

NEET Chemistry Syllabus 2026 Weightage			
Class	Chapter Name	Average Number of Questions	Weightage
NEET Physical Chemistry Chapter-wise Weightage			
Class XI	Mole Concept	2	5%
Class XI	Atomic Structure & Nuclear Chemistry	1	3%
Class XI	Gaseous State	1	3%
Class XI	Thermodynamics & Thermochemistry	1	3%
Class XI	Chemical Equilibrium	1	3%
Class XI	Ionic Equilibrium	2	4%
Class XI	Redox Reactions	1	2%
Class XII	Solid State	1	3%
Class XII	Solutions & Colligative Properties	2	4%
Class XII	Electrochemistry	1	3%
Class XII	Chemical Kinetics	2	4%
Class XII	Surface Chemistry	1	2%

NEET Organic Chemistry Chapter-wise Weightage			
Class XI	Hydrocarbons	2	4%
Class XI	General Organic Chemistry	2	5%
Class XII	Haloalkane	1	2%
Class XII	Aldehydes, Ketones, and Carboxylic Acids	2	3%
Class XII	Polymer	1	2%
Class XII	Alcohol, Phenol, Alkyl Halide	2	4%
Class XII	Aromatic Compounds	3	6%
Class XII	Biomolecules	2	4%
Class XII	Carbonyl Compounds	2	4%
Class XII	Organic Compounds comprising Nitrogen	2	3%
Class XII	Chemistry in Everyday Life	2	3%
Class XII	Environmental Chemistry	1	2%
Class XII	IUPAC & Isomerism	2	4%
Class XII	Practical Organic Chemistry	1	2%
NEET In-Organic Chemistry Chapter-wise Weightage			
Class XI	Chemical Bonding	4	9%
Class XI	P-Block Elements	3	7%
Class XI	Periodic Table & Periodicity in Properties	2	4%
Class XI	Hydrogen	1	2%
Class XI	S-Block Elements	1	3%
Class XII	Coordination Compounds	3	6%

Class XII	D and F-Block Elements	2	4%
Class XII	Metallurgy	1	2%
Class XII	Qualitative Analysis	1	2%

These trends are based on previous NEET paper analysis and may vary slightly in the actual examination.
