

Physics is often considered one of the most challenging sections of NEET due to its vast syllabus, concept-based questions, numerical problem-solving, and extensive formula application. Even after completing the syllabus, many aspirants find it difficult to apply concepts accurately in NEET-level MCQs within the given time limit.

Since Re-NEET UG 2026 is scheduled for 21 June 2026, aspirants have an opportunity to streamline their preparation by revisiting the complete Physics syllabus and focusing on important topics. A thorough understanding of the syllabus helps candidates identify key concepts, strengthen problem-solving skills, and plan revision more effectively.

Physics Wallah supports your NEET Physics preparation with notes, formula sheets, PYQs, MCQs, mock tests, and chapter-wise practice resources. NEET Unit-wise Physics Syllabus 2026

[PW 39 Years NEET Physics PYQ](#) Book contains chapterwise solved previous year NEET Physics questions with explanations, concept clarity, and extensive practice for NEET preparation.

Physics Unit	Description
Physics and Measurement	Units of measurement, SI units, fundamental and derived units, dimensions, dimensional analysis, errors in measurement, least count, significant figures and applications
Kinematics	Frame of reference, motion in straight line, speed, velocity, acceleration, position-time and velocity-time graphs, vectors, scalar and vector products, unit vector, relative velocity, projectile motion and uniform circular motion
Laws of Motion	Force and inertia, Newton's laws of motion, momentum, impulse, conservation of linear momentum, equilibrium of forces, static and kinetic friction, rolling friction, centripetal force and banked roads
Work, Energy, and Power	Work done by constant and variable force, kinetic and potential energy, work-energy theorem, conservation of mechanical energy, power, spring potential energy, vertical circular motion, elastic and inelastic collisions

Rotational Motion	Centre of mass, torque, angular momentum, conservation of angular momentum, moment of inertia, radius of gyration, parallel and perpendicular axis theorem, rotational dynamics and equilibrium of rigid bodies
Gravitation	Universal law of gravitation, acceleration due to gravity, variation with altitude and depth, Kepler's laws, gravitational potential energy, escape velocity, satellite motion, orbital velocity and time period
Properties of Solids and Liquids	Elastic behaviour, Hooke's law, Young's modulus, bulk modulus, viscosity, Stokes law, terminal velocity, Bernoulli's principle, surface tension, capillary rise, calorimetry, latent heat, conduction, convection and radiation
Thermodynamics	Thermal equilibrium, zeroth law of thermodynamics, heat, work, internal energy, first and second laws of thermodynamics, reversible and irreversible processes, isothermal and adiabatic processes
Kinetic Theory of Gases	Equation of state, kinetic theory of gases, pressure, RMS speed, degrees of freedom, law of equipartition of energy, mean free path and Avogadro number
Oscillations and Waves	Oscillations, periodic motion, SHM, spring and pendulum motion, wave motion, longitudinal and transverse waves, superposition principle, standing waves, harmonics, organ pipes and beats
Electrostatics	Electric charges, Coulomb's law, electric field, electric field lines, electric dipole, electric flux, Gauss's law, electric potential, equipotential surfaces, capacitance, dielectric medium and capacitors
Current Electricity	Electric current, drift velocity, mobility, Ohm's law, resistance, resistivity, conductivity, electrical energy and power, series and parallel combinations, cells, Kirchhoff's laws, Wheatstone bridge and metre bridge

Magnetic Effects of Current and Magnetism	Biot-Savart law, Ampere's law, magnetic force on a moving charge and conductor, galvanometer, magnetic dipole, bar magnet, magnetic field lines, para, dia and ferromagnetic substances
Electromagnetic Induction and Alternating Currents	Electromagnetic induction, Faraday's law, Lenz's law, eddy currents, self and mutual inductance, alternating current, RMS value, reactance, impedance, LCR circuits, AC generator and transformer
Electromagnetic Waves	Displacement current, electromagnetic waves, transverse nature, electromagnetic spectrum including radio waves, microwaves, infrared, visible light, ultraviolet rays, X-rays and gamma rays
Optics	Reflection and refraction, mirrors and lenses, lens maker formula, total internal reflection, prisms, microscopes, telescopes, wave optics, Huygens principle, Young's double slit experiment, diffraction and polarization
Dual Nature of Matter and Radiation	Dual nature of radiation, photoelectric effect, Hertz and Lenard observations, Einstein photoelectric equation, de Broglie relation and matter waves
Atoms and Nuclei	Rutherford scattering experiment, Bohr model, hydrogen spectrum, nuclear composition, mass defect, binding energy, nuclear fission and nuclear fusion
Electronic Devices	Semiconductors, semiconductor diode, rectifiers, LED, photodiode, solar cell, Zener diode, voltage regulator and logic gates including OR, AND, NOT, NAND and NOR
Experimental Skills	Vernier calipers, screw gauge, pendulum experiments, Young's modulus, surface tension, viscosity, speed of sound, specific heat, metre bridge, Ohm's law, galvanometer, focal length experiments, prism deviation, refractive index, diode and Zener diode characteristics

NEET Physics Chapter-wise Weightage 2026

Understanding chapter-wise weightage helps prioritise important Physics topics based on previous NEET trends. Chapters from Mechanics, Electrodynamics, and Modern Physics generally contribute a significant portion of the Physics section.

Physics Chapters/Topics	Average No. of Questions	Weightage (%)
Current Electricity	5	10%
Rotational Motion	3	6%
Ray Optics and Optical Instruments	3	6%
Semiconductor Electronics	3	5%
Units and Measurements	3	5%
Electrostatic Potential and Capacitance	3	5%
Moving Charges and Magnetism	2	5%
Nuclei	2	4%
Alternating Current	2	4%
Mechanical Properties of Fluids	2	3%
Electromagnetic Waves	2	3%
Dual Nature of Radiation and Matter	2	3%
Gravitation	2	3%
Work, Energy, and Power	2	3%
Electric Charges and Fields	2	3%

Oscillations	1	3%
Kinetic Theory of Gases	1	3%
Atoms	1	3%
Motion in a Plane	1	3%
Electromagnetic Induction	1	3%
Mechanical Properties of Solids	1	2%
Center of Mass & System of Particles	1	2%
Laws of Motion	1	2%
Thermodynamics	1	2%
Magnetism and Matter	1	1%
Mathematical Tools & Vectors	1	1%
Waves	1	1%
Thermal Properties of Matter	0	1%

These weightage trends are based on analysis of previous NEET papers and may vary slightly in the actual examination.
